To: CCID Water Users

From: Chris White, Manager CW

Date: August 10, 2015

The Exchange Contractors and Central California Irrigation District (CCID) have worked together with the United States Bureau of Reclamation (Reclamation) to preserve our summer allocation through the end of August. The present plan compensates for reduced pumping in the Delta by allowing Reclamation to borrow water that is already in San Luis Reservoir to meet our demand, and paying back borrowed water this fall, when pumping can be resumed. The pumping for payback will be a project priority and as we have previously notified our consumers, **we will not have additional fall water available for allocation.**

Please continue to be cautious with your water use through the summer and preserve and **carry as much of your January through August allocation as possible into the fall**, especially if you will need water this fall. We currently would expect to be able to deliver any water you are able to schedule for the fall into early November. Thank you for your patience, cooperation and careful water use this year.

Should you have any questions please call the Main Office at (209) 826-1421.
